RG 128 Records of the Joint Committee on Atomic Energy 1946-1977, 396 linear ft.

The Joint Committee on Atomic Energy (JCAE) was established on August 2, 1946, under the provisions of the Atomic Energy Act of 1946 (60 Stat. 755). That legislation was proposed by its predecessor committee--the United States Senate Special Committee on Atomic Energy (79th Congress). The Joint Committee was unusual in that its legislative powers were established by law rather than by a Senate rule. Composed of nine members from the Senate and nine from the U.S. House of Representatives, the JCAE's principle function was to oversee the activities of the Atomic Energy Commission (also established on August 2, 1946; 60 Stat. 755) and to make continuing studies of the problems relating to the development, use, and control of Atomic Energy.

As a result of the Energy Reorganizing Act of 1974 (88 Stat. 1233), the AEC was abolished and its functions were divided between two successor agencies--the Nuclear Regulatory Commission (NRC) and the Energy Research and Development Administration (ERDA). As of January 19, 1975, the JCAE assumed oversight responsibilities for these two agencies.

The Committee Systems Reorganization Amendments of 1977 (S. Res. 4, 95th Congress) proposed a general reorganization of Senate Committees that included abolishing the JCAE. Subsequent legislation (91 Stat. 884) provided for the JCAE's dissolution and the transfer of its functions to the following committees: The Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on the Environment and Public Works, and the Committee on Foreign Relations. This legislation took effect on September 20, 1977.

The records of the JCAE at the National Archives are arranged in eleven series. The main series include the unclassified general subject file (I) and unclassified transcripts of hearings and meetings held in executive session (II). There are also several parallel classified series: the classified general subject file (V) and transcripts to hearings and meetings held in executive session (VI), as well as indexes (III and IV) to each series. Two series (VII and VIII) are investigative records dealing with the nominations of David E. Lilienthal and Allen Whitfield to be chairman and commissioner of the AEC, respectively. Other series include the files of Senator Brien McMahon (IX), the first chairman of the JCAE; the records of the Panel on the Impact of the Peaceful Uses of Atomic Energy (X); and general administrative and financial records (XI).

I. Unclassified General Subject File, 1946-1977, 310 linear ft.

Arranged alphabetically by subject, frequently with subheadings also arranged alphabetically. A few of these subheadings are further divided alphabetically or chronologically. A folder title listing appears as Appendix I of this inventory.

During its thirty year existence, the Committee made a variety of changes in its subject headings, important examples of which follow. When the functions of the AEC were divided up between the ERDA and the NRC in 1975, the file designation "AEC" was retained for all ERDA material. The NRC was given a separate heading and all AEC regulatory materials were transferred to this new "NRC" heading. After 1958, materials filed under "Ores and Raw Materials" were placed under "Source Materials" so that a subheading such as "Uranium" appears under both these headings. While legislative files were initially divided into "AEC Legislation" and "Legislation", after 1958 they were consolidated under the heading "Legislation". Also, roughly after 1958, documents that have been filed under "Foreign Activities", "Foreign Relations", and "International Negotiations" were amalgamated under the heading "Foreign Relations". Hearings are filed under either their subject or under "Hearings" and thereunder by date or subject. Other changes can be determined by consulting Appendix I of this inventory.

The series consists chiefly of correspondence. Correspondents include the AEC and its successor agencies, the ERDA and the NRC; executive departments; members of Congress; electric and atomic power utilities; plant construction firms; businessmen and consultants in the atomic energy field; private citizens; and research institutions. Also included are memoranda; printed reports; studies; brochures and pamphlets; histories; logbooks; minutes of meetings; transcripts of hearings on nominations and other subjects; printed hearings and committee prints; bills; speeches and press releases; maps and photographs; and newspaper and journal articles. Some administrative files and other records relating to the activities of the Committee and the Committee Staff are filed under the heading "Committee" with appropriate subheadings. A few records of the Special Senate Committee on Atomic Energy (79th Congress) are also found among these files.

Classified records that were part of this series are in the classified General Subject File (IV).

II. Unclassified Transcripts of Hearings held in Executive Session, 1954-1961, 4 linear ft.

Arranged chronologically by date of hearings or meetings. See Appendix II for listing of hearings and meetings. Classified records that were part of this series are in the classified Transcripts of Hearings held in Executive Session (IV).

III. Index to the Classified General Subject Files, 1947-1977, 3 inches

There is a classified finding aid for the General Subject File arranged alphabetically by subject.

Information included in the index is the subject of the document, document number, date, and description of document (sender and recipient where applicable).

IV. Classified General Subject Files, 1947-1977, 27 linear ft.

Records are arranged alphabetically by subject and thereunder by date. A listing of all documents from this series that have been declassified is included in Appendix III.

The records contain a wide variety of subjects: Foreign Activities; Foreign Negotiations; Foreign Weapons; Gascons Diffusion Plants; Isotopes; Joint Chiefs of Staff; Project Pluto; Rand Corporation; Security; Reactor Development Program; Weapons Test; Thermonuclear Program; Space Electric Power; Ores and Raw Materials; and Radiation. In addition, the records included correspondence, memoranda, reports, photographs, charts, and training manuals.

V. Index to Classified Transcripts of Meetings Hearings held in Executive Session, 1947-1977, 1 inch

The classified finding aid is arranged by Congress and thereunder chronologically.

Information included in the index is date of the hearing or meeting, subject, file number, description of document.

VI. Classified Transcripts of Meetings and Hearings held in Executive Session, 1947-1977, 30 linear ft.

Records are arranged by Congress and thereunder chronologically by the date of the hearing or meeting. A listing of the hearings and meetings that have been declassified is included in Appendix IV.

VII. Records relating to the nomination of David E. Lilienthal, Chairman of the AEC, January 1947-March 1947, 2 linear ft.

Arranged alphabetically by subject. A folder title listing appears as Appendix V of this inventory.

From 1946 to 1950 David E. Lilienthal was chairman of the AEC. Prior to his appointment to that post, he served as chairman of the Tennessee Valley Authority (TVA), 1941-1946. The committee created or received these materials while it considered the nomination of Liliental to be the chairman of the AEC. The JCAE conducted an investigation of conflict of interest charges raised as a result of Lilienthal's previous position with the TVA. Hearings were held January 27-30, February 3-8, 10-12, 17-22, March 3-4, 1947.

The records are evenly split between correspondence (including attached reports, newspaper clippings, and other evidential material) and printed hearings. In addition to a copy of the 1947 nomination hearings on the confirmation of Lilienthal, Robert F. Bacher, Sumner T. Pike, Lewis S. Strauss, and William W. Waymack, informational copies of other hearings are also included.

VIII. Records relating to the investigation of the nomination of Allen Whitfield to be a member of the AEC, 1937-1955, 1 ft.

Arranged by subject. A folder title listing appears as Appendix VI of this inventory.

Allen Whitfield was nominated to be a commissioner of the AEC in 1955. The JCAE staff investigated various allegations of his financial irregularities.

The records consist of photostatic copies of wills, financial statements, and other evidential materials; a roll of microfilm; and the JCAE staff report on the results of the investigations.

IX. Files of Senator Brien McMahon, First Chairman of the JCAE, 1945-1950, 3 linear ft.

Arranged alphabetically by subject. A folder title listing appears as Appendix VII of this inventory.

While serving as Chairman of the Special Senate Committee on Atomic Energy (79th Congress), Senator Brien McMahon of Connecticut introduced the bill that ultimately established the JCAE. In 1945, he became the first chairman of the JCAE and, after a two year interruption (1947-48), he again chaired the Committee from 1949 until his death in 1952.

The records consist mainly of correspondence, primarily from members of Congress, private citizens, executive departments, and businessmen. Also included are reports, copies of bills, memoranda, newspaper clippings, and other printed materials. A few files relate to McMahon's non-Committee responsibilities as a Senator from Connecticut.

X. Records of the Panel on the Impact of the Peaceful Uses of Atomic Energy, March 1955-March 1956, 5 linear ft.

Arranged numerically by chapter number, corresponding to those in the report and also by subject. A folder title listing appears as Appendix VIII of this inventory.

The panel was established by the JCAE on March 26, 1955 and was composed of nine private citizens: Ernest R. Breech, George R. Brown, Sutherland C. Dows, John R. Dunning, Frank M. Folsom, T. Keith Glennan, Samuel B. Morris, Walter P. Reuther, and Robert McKinney who served as chairman. They were charged with conducting a comprehensive study of the peaceful uses of atomic energy and recommending to the Committee legislative or administrative action that would promote such uses. Areas

investigated included medicine and public health, agriculture, food preservation, industrial uses, propulsion, and electric power. The results of the panel's work, produced on January 30, 1956, were published in a two volume joint committee print.

The records consist of correspondence, reports and surveys, and partial drafts and galley proofs of the final report. Correspondents include the AEC, executive departments, and officials of interested industries.

Records relating to the establishment of the Panel and its activities can also be found in Series I--General Correspondence, under headings "McKinney Panel", "McKinney Study", and "Panel-Hearings Correspondence" and in Series VI. General Administrative and Financial Records under "FY 1960, McKinney Panel". Records relating to the activities of other panels established by the JCAE--the Atomic Plant Expansion Advisory Panel (1952); the Advisory Panel on Military Applications (1958); and others--are found in Series I--General Correspondence under "Committee: Advisory Panels".

XI. General Administration and Financial Records, 1945-1976, 24 linear ft.

Arranged chronologically by year or fiscal year and thereunder by type of subject.

The records consist of bank statements; payrolls; petty cash receipts; vouchers; travel accounts; budget material; a GAO audit; fiscal expenditures; staff leave, time, and attendance records; daily guard registers; and visitor's log books. The records are not complete for every year. Related records of the Special Committee on Atomic Energy (79th Congress) are also found in this series.

Access: Because the Senate assumed administrative responsibility for the records of the JCAE, the rules of access to Senate records, as set forth in Senate Resolution 474, 96th Congress, are observed. The resolution provides that most records are available to the public 20 years after their creation with the exception of investigative files relating to individuals and containing personal data, personnel records, and records of nominations, which are closed for 50 years. The declassification of national security classified information is available through the declassification procedures outlined in E.O. 12356.

Related Records: Records of the Special Senate Committee on Atomic Energy (RG 46). See P.I. #62.

These records were arranged and described by Margery Sly.
